

Aptech Systems, Inc.

License Summary

Aptech Systems offers the following license types for the GAUSS family of products. Please see the License Agreement accompanying your Software purchase for specific License Terms and Conditions.

1. **Single User:** The Software Product is installed on the local hard drive of one computer. It cannot be accessed over a computer network. The Registered User may also install the Software Product on one home computer (which may be a lap top computer), so long as both copies of the Software Product are not in use at the same time. Installation of the Software Product on a third computer (e.g., lap top computer) is only permitted if Premier Support is current and no more than one copy of the Software Product is in use at the same time.
2. **Network:** The Software Product is installed and accessed on computers that are connected to each other over a computer network for use up to the number of simultaneous users (e.g., network increments) specified on Aptech's invoice. If Premier Support has been purchased and is current, the Software Product may be installed and used on one home computer (which may be a lap top computer). Installation of the Software Product on additional home or lap top computers is only permitted if a separate annual fee is paid for each installation of the Software Product and Premier Support is current.
3. **Server Locked:** A Server Locked license means the Software Product is installed and executed on ONE Server for an unlimited number of simultaneous users. No installation on home or lap top computers is permitted. There is a fee for each additional CPU installed on the Server.
4. **Instructional Lab/Classroom.** Licensee may install and use the Software Product on the number of computers or terminals (stand-alone or networked) equal to the number of Lab Increments purchased and set forth on Aptech's invoice SOLELY AND EXCLUSIVELY FOR TEACHING AND CLASSROOM PURPOSES; no paid or funded research or other non-teaching purposes are allowed. No installation on home or lap top computers is permitted. This is an annual license and must be renewed on the anniversary date of the initial license purchase. The annual license fee is fixed for the first three years of the license and is subject to change after the third year.
5. **Site License.** Licensee may install and use the Software Products on stand-alone computers ("Computer") at one business or campus location up to the number of computers or terminals covered by the Initial/Base License, which includes 10 user licenses, plus any additional Site Increments purchased (sold in 10 User Increment packs) as set forth on Aptech's invoice. This is an annual license and must be renewed on the anniversary date of the initial license purchase. The annual license fee is fixed for the first three years of the license and is subject to change after the third year.
 - a. **General.** The Site License is for one physical location and does not include campus extensions or other business locations and is for installation and use on stand-alone computers only.
 - b. **Network Use.** If the Software Product is to be accessed over a computer network, the Network Use Option must be purchased by Licensee.
 - The Network Use Option provides that if Licensee is using a Software Product that does not contain a license manager requiring an Aptech-provided license code to use the Software Product and is installing the Software Product onto a Network, Licensee must, at Licensee's sole cost and expense, operate additional metering software to ensure that at no time the number of simultaneous users using the Software Products exceeds the number of Site Increments Purchased by Licensee.

- If Licensee is using a Software Product that contains an Aptech-provided license manager, the Software Product will govern the number of Site Increments and access to the Software Products. Under no circumstances shall the total number of simultaneous users exceed the number of Site Increments Purchased by Licensee.
 - If the Network Use License Option is purchased, installation onto a home computer is prohibited.
 - The License Fee for the Network Option is an additional fee of 20% of the Site License Fee.
- c. **Home Use.** Installation of the Software Products onto a home computer is prohibited under this Site License unless the Home Use License Option is Purchased (as described below). The Home Use License Option provides that License shall limit the installation of the Software Product onto only home computers of end-users that REGULARLY use the Software Product at the Licensee's Site.
- The number of home computers that the Software Product is installed onto shall not exceed the total number of Site Increments Purchased by Licensee.
 - Under no circumstances shall one Site Increment be used on more than one home computer at any one time.
 - The License Fee for the Home Use Option is either an additional fee of 20% of the annual Site License Fee OR a set annual fee for each installation of the Software Product onto a home or lap top computer.
6. **GAUSS Run-time Module (GRTM)-Noncommercial Redistribution.** The GRTM is free and available via download from Aptech's ftp-site. The GRTM allows Licensee to redistribute Licensee's compiled GAUSS programs FREE OF CHARGE to other users who do not have GAUSS so long as Licensee's GAUSS program is distributed free of charge.
7. **GAUSS Engine.** The GAUSS Engine comes in four license configurations:
- GAUSS Engine Personal Edition: Single User, Network or Server Locked Licenses available. Does NOT included the GAUSS Run-Time Engine (see Item #8 below).
 - GAUSS Engine Pro: Network License of one Simultaneous User. Includes the GAUSS Run-Time Engine for royalty-free distribution of Licensee's programs compiled with the GAUSS Engine.
 - GAUSS Engine for Workgroups: Network License of two or more Simultaneous Users. Includes the GAUSS Run-Time Engine for royalty-free distribution of Licensee's programs compiled with the GAUSS Engine.
 - GAUSS Enterprise Engine: Network License of ten or more Simultaneous Users. Includes the GAUSS Run-Time Engine for royalty-free distribution of Licensee's programs compiled with the GAUSS Engine.
8. **GAUSS Run-time Engine (GRTE)-Commercial Redistribution.** The GRTE is included at no additional charge with the purchase of the GAUSS Engine Pro, GAUSS Engine for Workgroups or the GAUSS Enterprise Engine products. It provides royalty-free distribution of Licensee's compiled programs. Please see Aptech's web-site at www.Aptech.com for more information.
